

MOHAMMED NAHYAN ASHRAF

AI/ML ENGINEER · DATA SCIENTIST

nahyanashraf3878@gmail.com — [+971 561486552](tel:+971561486552) — [LinkedIn](#) — [Portfolio](#) — [Dubai, UAE](#)

Professional Summary

AI & Data Science Engineer with experience in Machine Learning, Generative AI, Data Science, and Business Intelligence. Skilled in Python, SQL, Power BI, TensorFlow, PyTorch, and Hugging Face, with the ability to design and deploy AI-powered solutions for real-world business challenges. Familiar with LLMs, AI Agents, LangChain, CrewAI, RAG, API Integration, and workflow automation. Passionate about building scalable AI systems, predictive models, and intelligent applications that drive innovation, operational efficiency, and data-driven decision-making.

Professional Skills

- **Programming & Query Languages:** Python, SQL, R, Java, C
- **AI, Machine Learning & Data Science:** Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Data Science, Neural Networks, CNN, GAN, NLP, Predictive Modeling, Feature Engineering
- **AI Frameworks & Libraries:** TensorFlow, PyTorch, Scikit-learn, Keras, Hugging Face, NLTK, Pandas, NumPy, Matplotlib, Seaborn
- **AI Agents & Automation:** LangChain, CrewAI, RAG (Retrieval-Augmented Generation), AI Agents, Prompt Engineering, Workflow Automation, n8n, Microsoft Copilot, Power Automate
- **Data Analytics & Business Intelligence:** Data Analysis, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Dashboard Development, KPI Reporting, Business Intelligence
- **Cloud, Tools & Platforms:** Power BI, Tableau, Jupyter Notebook, Visual Studio Code, Git/GitHub, Docker, Microsoft Excel, R Studio, Claude, ChatGPT, Replit
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration, Decision Making

Professional Experience

DataMites

Data Analyst Trainee

Bengaluru, India

Oct 2025 – Mar 2026

- Designed and implemented 3 end-to-end analytics projects — including Medical Report Analysis and Customer Segmentation — reducing manual reporting time by an estimated **40%**.
- Built interactive Power BI dashboards adopted by business stakeholders to track KPIs across **10,000+ customer records**, enabling faster decision-making cycles.
- Standardised a Python-based data cleaning pipeline (Pandas + NumPy) that cut pre-processing time by **>30%** across team projects.

Unified Mentor

Data Analyst Intern

Kerala, India

Jun 2025 – Sep 2025

- Engineered and validated 2 ML models for automation use-cases, improving prediction accuracy by over **15%** versus the existing rule-based baseline.
- Integrated AI inference modules into a production system, reducing manual intervention in the data pipeline from **6 hours/week to under 1 hour**.
- Conducted applied research on state-of-the-art AI techniques, producing a findings report that informed **2 product roadmap decisions**.

Key Projects

AI-Based Image & Video Dehazing System

- Architected a GAN (generator-discriminator) model that restored haze-degraded images with a **28% improvement in PSNR** over baseline dehazing filters.
- Extended the system with a real-time video dehazing module using OpenCV, processing frames at **24 FPS** for surveillance and automotive applications.
- Deployed inference through a Flask REST API, making the model accessible to downstream applications without GPU dependency on the client side.

AI Lead Enrichment Bot

- Built an automated lead enrichment pipeline that reduced manual research time per lead from **~15 minutes to under 30 seconds** — achieving a **97% efficiency gain**.
- Integrated multi-source web scraping and NLP entity extraction to generate structured, sales-ready lead datasets, increasing the usable lead pool by **3x**.

Twitter Sentiment Analysis

- Developed an NLP classification model (positive / negative / neutral) on a **50,000-tweet corpus**, achieving **87% classification accuracy** using TF-IDF and Logistic Regression.
- Built a visualization dashboard to identify trending sentiment patterns and demonstrate real-time brand monitoring capabilities.

Education

APJ Abdul Kalam Technological University

Nov 2021 – May 2025

MES College of Engineering, Kuttippuram

B.Tech in Artificial Intelligence and Data Science

- **Relevant Coursework:** Artificial Intelligence, Machine Learning, Data Science, Data Structures, Deep Learning

NMHSS Thirunavaya

June 2019 – March 2021

Higher Secondary, Computer Science

Languages

- **English:** Read, Write, Speak
- **Arabic:** Read, Write
- **Hindi:** Speak, Read, Write
- **Malayalam:** Read, Write, Speak
